

## Scatter Wash and Tributaries Floodplain and Floodway Re-delineation Studies

The Flood Control District of Maricopa County (District) and the City of Phoenix (City) invite you to an open house to view the preliminary study details and results of detailed re-delineations of floodplains and floodways along 2.6 miles of Scatter Wash and 1.1 miles of its tributaries. The study has refined the areas of currently regulated floodplains based on more detailed topography (land elevation), using currently accepted study methods, updated land-use information, and more accurate rainfall data.

### About Floodplain/ Floodway Delineations

The Flood Control District of Maricopa County manages the floodplains for unincorporated Maricopa County and 13 municipalities. While the Scatter Wash and Tributaries study area lies entirely within the City of Phoenix, the District managed this study on behalf of the City. The District conducts floodplain and floodway delineation studies to identify areas that are subject to flood inundation by a 100-year flood (one percent chance of occurring in any year). The resulting floodplain maps are used for floodplain management purposes and are submitted to the Federal Emergency Management Agency for revisions to Flood Insurance Rate Maps.

Map not to scale.

## You're Invited to an Open House

Representatives from the Flood Control District of Maricopa County, the City of Phoenix, and the consultant team will explain the preliminary details and results of the re-delineation study and show how your property may be affected. Please bring this brochure to the open house. Your property's Assessor's Tax Parcel Number is printed on the address label and can help reference your property on study maps.

Thursday, January 16, 2014

6:00PM–7:30PM

Deer Valley Middle School
